More Light

Many plastics lose a considerable portion of their light transmission during use. Sheets may become darker. PLEXIGLAS® does not. Depending on material grade and region, clear-transparent sheets still retain up to 90% light transmission after 30 years of service life. This is one of the best transmission levels offered by any plastic.

We guarantee that PLEXIGLAS® sheets will show no visible yellowing for 30 years.

We guarantee that PLEXIGLAS® sheets in Clear grade will retain a high level of light transmission for 30 years.
